Slater Investments Announces New Article 8 Classification

Slater Investments Limited is delighted to announce that the Slater Growth, Recovery & Income Funds have become Article 8 classified under the Sustainable Financial Disclosure Regulation (SFDR). SFDR requires fund managers to disclose information on various environmental, social and governance ("ESG") indicators to investors.

The ESG Committee at Slater Investments works closely with the Investment Committee to ensure ESG-based investment analysis, alongside active and engaged stewardship, is value accretive and embedded in each fund's investment processes and subsequent ongoing monitoring.

In September 2019, Slater Investments became a signatory to the United Nations supported Principles for Responsible Investment. Slater Investments became one of the first signatories to the Financial Reporting Council's UK Stewardship Code 2020, which sets high stewardship standards for asset owners and managers.

Mark Slater, Chairman of Slater Investments, commented:

“We are very pleased about the Slater Fund's new Article 8 classification. Considering ESG issues has long been part of our investment process, and this announcement is an important step in codifying our belief that the analysis of and engagement on ESG factors is an integral part of seeking strong investment performance. This announcement underscores our ongoing commitment to responsible investing.”
