Key Investor Information

Slater Growth Fund Class B Units
(ISIN Accumulation GB00B8YPGL91)
This fund is managed by Slater Investments Limited

Objectives & Investment Policy

The Slater Growth Fund aims to achieve capital growth by investing mainly in UK shares. The fund will focus in particular on shares which the Manager believes are currently under-valued and that have the potential of a significant re-rating. It is also intended where appropriate to take advantage of underwritings and placings.

The fund may also invest in, but is not limited to, shares in overseas companies and cash.

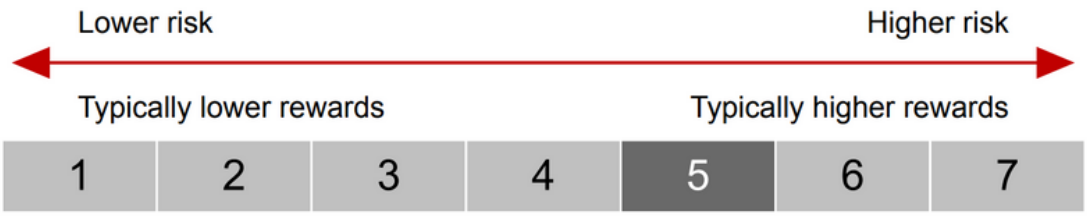
The fund may invest in derivatives and forward transactions for the reduction of risk or costs, or the generation of additional capital or income with an acceptably low level of risk.

The Fund Manager to the fund decides which investments to buy and when within the constraints of the objectives and policy. The fund is not constrained by a benchmark.

The Slater Growth Fund does not pay income. Instead, any income received by the fund is reinvested back into the fund.

You can sell all or part of your investment on a daily basis subject to the minimum holding requirements.

Risk and Reward Policy



The risk and reward indicator above aims to provide you with an indication of the overall risk and reward profile of the fund. It is calculated based on the volatility of the fund using weekly historic returns over the last five years. If five years data is not available for a fund, the returns of a representative portfolio are used.

As the risk and reward indicator is calculated based on historical data it may not be a reliable indication of the future risk profile of the fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. The value of investments and the income from them may fall as well as rise and you may not get back the amount you originally invested.

This fund has been measured as 5 because it has experienced high volatility historically. The fund's volatility is affected by various factors including:

- The fund will be exposed to stock markets. Stock market prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events.

-The fund will invest in the shares of smaller companies which are more volatile over shorter time periods.

- The fund has a concentrated portfolio which means greater exposure to a smaller number of securities than a more diversified portfolio. The fund may experience greater volatility as a result of this.

The fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the fund.

Risks which are not adequately captured by the risk indicator include:

- In certain market conditions some assets in the fund may be less liquid and therefore more difficult to sell at their true value or in a timely manner.

A more detailed description of the risks that apply to this fund can be found in the Prospectus.
